

# THE LIGHTING PROFESSIONALS

## COMPANY PROFILE

# About Expertise Goals

As lighting experts, PROLIGHT LLC, started its operation in Abu Dhabi in 2007. We are suppliers of indoor and outdoor lighting products in classical and contemporary designs for MENA region. Our major imported brands are mainly from Italy, Belgium, Germany, Spain, Greece and other countries.

Our Sales team consists of highly trained and qualified professionals available to assist in the development of different lighting design/ solutions including but not limited to projects such as commercial buildings, villas, hotels, restaurants, residential apartments, shops, showrooms, gardens, industrial lighting, etc.

We are dedicated to offer products with the highest standards in terms of design, quality and reliability. In addition, we also strive to meet our customer's need by providing them with the most convenient, complete and efficient lighting solutions through value added lighting design services, technical and after sales support.

We are associated with various lighting specifiers involved in designing new lighting systems, as well as renovating existing systems. We meet the end-user's objectives, examine the intended use of venue, help to establish the lighting system parameters and electrical power requirements to provide cost effective solutions.

We support excellence as a standard and everything we do is grounded with what is feasible, sustainable and eco-friendly. We believe that in order to survive and remain at the forefront of the industry in an environment that is constantly changing, we must have the adaptability, agility, long term vision and expertise to respond to this uncertain landscape.

## About Expertise Goals

In its continuous effort to achieve excellence, Prolight LLC provides intelligent lighting solutions for retail, leisure, office, health care, residential, industrial, private and public sectors. We work closely with our clients, including architects, designers, consultants and engineers to achieve creative, flexible and practical lighting schemes for exterior and interior environments. We provide technical support, product specification, design of customized lighting, and managing the supply and delivery of all lighting fixtures and fittings.

As we believe that Experience is one the keys to success, we learned that successful lighting solutions are achieved by blending the right combination of design and engineering. We learned also that technical issues, such as compliance and performance, are balanced in such a way to create an inviting, inspiring and safe environment.

Not only are we intimately involved throughout the design process, but we ensure that our lighting plans conform to all life safety, sustainability and green energy codes, and are compatible with most power and controls systems. In addition, our lighting professionals work with all members of the project team to develop designs which enhance the architectural vision, meet task and user needs, complement the interior design.

We know the importance that our Clients place on lighting that is not only functional, but beautiful and unique We understand the difference between vision and realization and. We have a proven track record of taking a vision and turning it into reality considering the time, budget, and in a way that is easy to maintain.

# About Expertise Goals
